the national conservative government of hungary has been heavily criticised for its violation of eu values primarily the rule of law in recent years this book looks to the bigger picture in examining the rule of law debate between hungary and the eu it explores how certain elements of various hungarian constitutional reforms are interrelated and how the eu has failed to address the situation properly it is argued here that the reason the eu has been unable to enforce its values effectively in hungary stems from the misunderstanding that hungary kept the institutional design of liberal democracy but made it dysfunctional the debate with the eu is characterised as a dialogue of the deaf as the eu insists on advancing the rule of law agenda while the hungarian government defends itself by alluding to its democratic legitimacy the author contends that the hungarian government is in fact playing a charade while the actions of the eu maintain this drama the book will be of interest to students academics and policymakers working in the areas of constitutional law and politics eu law and populism
